

When you need to bring a new drug or device to the market efficiently, Chiltern's Medidata Rave Value Accelerators save you time and money with tools **Designed Around You**®.

Chiltern's Medidata Rave Value Accelerators are the most advanced and robust tools for capturing, managing and reporting clinical data in Phase I–IV studies. Our suite includes three tools to streamline the clinical trial process and help you optimize your R&D investments, realizing considerable time and cost savings and maximizing the quality of your deliverables.

In any clinical trial, even the slightest saving in time, cost or effort can contribute greatly to the study's progress. The technologies incorporated into Chiltern's Medidata Rave Value Accelerators are designed for flexibility. You choose the right accelerator for your needs.

EFFICIENT

EFFECTIVE

EVERYWHERE

# Chiltern Medidata Rave® Value Accelerators

## WHY CHOOSE VALUE ACCELERATORS?

- Ensure high quality and timely delivery of study design, thereby reducing downstream rework and post-production changes due to build errors
- Improve productivity through reductions in programmers' manual efforts and time to complete study design
- Streamline study setup, QC and UAT processes
- Collect all study information in one place and expedite reconciliation for complex studies
- Shorten learning curves with user-friendly reconciliation reports

## MEET SOME OF OUR THOUGHT LEADERS

### MARK PENNISTON

Executive Vice President, Clinical Analytics, and General Manager

As head of Chiltern's Clinical Analytics, Mark Penniston leads a team of global professionals creating clinical data analytics, data management, biometrics, statistical programming and CDISC solutions.

### JAMES W. GUNTER

Executive Director, Clinical Analytics

As executive director of Chiltern's Clinical Analytics, James Gunter provides strategic direction for departments that provide statistical programming, statistics, and data management functional services provider (FSP) services for clients.
